

# SNAKE OUT<sup>®</sup>

**The green solution to snakes.**

KEEP SNAKES OUT. . .NATURALLY.

Snakes “taste” the surrounding air, and the special blend of ingredients in Snake Out Snake Repellent is especially unpleasant to them. When they come into contact with Snake Out in the air, an escape/avoidance reaction is triggered so the snakes are actually repelled away from the product.

Snake Out can be used anywhere snakes are not wanted.  
Snake Out doesn't harm snakes; instead, it actually repels them—naturally.

- Unique blend of ingredients that snakes find very unpleasant.
- Does not harm snakes, but repels them away from areas where you don't want them.
- Biodegradable.
- Will not harm lawns, gardens, flower beds or other desirable plants when used as directed.
- May be used in areas where children and pets play.
- Apply around homes, foundations, barns & outbuildings, garages, woodpiles, sheds, campsites – anywhere where snakes may be a problem.
- Easy-to-apply patented Comfort Grip<sup>®</sup> container.
- Snake Out's natural oil active ingredients are exempt from EPA regulation – EPA 25(b) exempt.
- Does not contain naphthalene.
- Part of your Green Pest Management<sup>®</sup> program.

#### **OTHER INGREDIENTS:**

Sulfur, Fuller's Earth, Water	
SUBTOTAL, Other Ingredients.....	96.0%

**TOTAL**.....100.0%

**SNAKE OUT Snake Repellent** effectively repels snakes from around your home or structure. Apply around homes, garages, barns, swimming pools, gardens (not for use directly on vegetable gardens), garden sheds, woodpiles, and other areas where snakes may be a problem. May be used in areas where children and pets play. Snake Out Snake Repellent is biodegradable and, when used as directed, will not harm lawns, gardens, flowerbeds or other desirable plants. Not for aquatic use. Do not apply to crops being grown for food or feed.

Snake Out is an EPA 25(b) exempt product. This product is not registered with the Environmental Protection Agency. Nisus Corporation represents that this product qualifies for exemption from registration under Federal Insecticide, Fungicide, and Rodenticide Act.

#### **How It Works:**

Snakes can actually taste the air around them via a receptor organ known as the *Jacobson's organ*. Snake Out's unique combination of ingredients creates a powerful taste/scent that snakes find unpleasant and triggers an avoidance behavior that makes snakes want to escape the area where it is applied. Snake Out Snake Repellent does not harm snakes; it drives them away from areas where people, pets and children may be active.

#### **How To Use:**

Using the convenient shaker top on this package, lightly sprinkle a band 6-8 inches wide, around, into or next to the area you wish to protect. It is not necessary to cover the ground completely with product. One pound will treat a band 8 inches wide by 50 feet in length or 1 lb per 100 square feet. Do not water in after application. For outdoor use, reapply product after heavy rains or every two weeks to obtain best results. Snake Out works best and lasts longer when applied to protected areas such as crawlspaces, attics and any areas protected from rainfall. Apply into voids, holes and cracks in and around the structure where snakes may enter. Snake Out can be applied to the interior perimeter of garages, storage rooms, sheds, out buildings and boat houses. Apply Snake Out to the interior perimeter walls of crawlspaces, basements and to sill areas above the foundation walls where snakes may travel or harbor. A duster applicator may be used to apply Snake Out into in accessible area.

Endangered Species Considerations – Before using this product, consult with State or local wildlife authorities to ensure that use does not present a hazard to any threatened or endangered species. Where necessary, obtaining all required permits and licenses is the responsibility of the applicator.
